## Version 1.1

## Abstract

The digital asset space has seen explosive growth over the past year, with average daily exchange-trading volume across all crypto assets surpassing 18 billion USD equivalent and total estimated market cap for blockchain instruments exceeding 325 billion USD equivalent as of April 2018.<sup>1</sup> Over 200 crypto-focused hedge funds have been formed as of February 2018, while traditional trading houses continue to express interest in increasing their exposure to blockchain assets. But crypto investors continue to lack a number of crucial tools that will be necessary for the space to achieve its potential. Key among these are professional-grade trade execution, compliance, position and risk management and reporting functionality.

The large number of digital asset exchanges helps drive the growth of the market while simultaneously exacerbating its challenges. Currently, crypto investors are forced to choose among many exchanges when executing various trades. Often, portfolios develop positions on multiple trading platforms with varying user interfaces and functionality. Executing orders across these various exchanges is often difficult. Position and risk management are likewise made more challenging by the diversity of platforms that must often be used to trade for a single portfolio. Because it is difficult to harmonize the outputs of different platforms, meeting reporting and compliance requirements can present significant obstacles for crypto investors as well.

Defi access is a leading blockchain and cryptocurrency investment firm. It provides institutional and experienced investors with a full-stack crypto trading and risk management platform. It equips digital assets investors with a comprehensive Order and Execution Management System (OEMS), Position Management System (PMS), and Risk Management System (RMS), backed by experienced support team.

## Solution: An Institutional Grade Crypto Trading Platform

Defi access is an ecosystem designed to solve the problems facing crypto investors using a single, user-friendly interface. It achieves this by providing sophisticated connectivity and interoperability across various digital asset exchanges. Defi access is expected to drive further growth in digital asset participation on the part of institutional and experienced investors. Defi access equips investors with a comprehensive OEMS, PMS and RMS, backed by comprehensive customer support. Its features include professional-grade execution, position management, and reporting capabilities. Defi access is not designed to disrupt the current digital asset space or to compete with existing exchanges. Its purpose is to support purchasing of digital asset instruments in a reliable manner to a large number of entrants, helping to bring

liquidity, volume, and dynamism to the sector.

## **An Overview of Decentralized Finance ( DeFi )**

What is decentralized finance? Decentralized finance is the name given to the trend of taking financial services from the traditional centralized world and putting it in a blockchain decentralized world, Decentralize finance (“DeFi”) is a concept of financial ecosystem, living digitally on a shared infrastructure. In this world, typical financial services such as borrowing, lending, investing and trading exist, but they operate on a public network, meaning it’s accessible to anyone with an internet connection.

Often described as “traditional finance meets decentralization”, DeFi is an umbrella term used to describe a variety of financial applications that use smart contracts to allow autonomous execution. This means that services typically provided by intermediaries—such as an exchange or clearing house can instead be deployed as code running on an open blockchain network such as Ethereum and are accessible by those who have an Internet connection and a digital asset wallet.

The DeFi market, as measured by Total Value Locked (“TVL”), has grown from \$1 billion in June 2020 to over \$50 billion today. TVL is the value of assets locked in DeFi smart contracts and is an indicator of a protocol’s usage and liquidity.

## The Future Of Defi

As of November 2020, less than \$20 billion worth of value was locked in various DeFi products, most of them on Ethereum, By the following year, it was worth more than \$260 billion , with \$19 billion coming from Binance Smart Chain alone. If the trend continues and the DeFi maxima lists are right, this is just the beginning of a massive DeFi wave. After a 20X increase in total value (TVL) over the course of 2020 and a user base that's grown to over 1 million people, it's safe to say that DeFi is the frontier of choice for those looking to invest in alternative channels.

It's estimated that the global financial system sucks out about 6% of the world's economic output, that's \$8 trillion up for grabs, and I bet that DeFi will end up consuming most of it. It's a really simple bet, you don't have to be a rocket scientist and have the ability to understand deep math to get this right.

DeFi Market Size is Huge and Spans Multiple Sectors From predictions market to insurance and lending, many industries have the potential to be disrupted by decentralization.

## **What is Defi access ?**

Defi access is a digital asset investment firm that allows traditional investors to identify and invest in a diversified portfolio of digital assets across the decentralized finance, Web 3.0, and gaming sector. We are the only publicly-traded company built to give investors direct exposure to these nascent markets.

Our Mission is to expand investor access to sustainable, industry-leading decentralized technologies including Web 3.0 and gaming - enabling access to the future of finance via regulated equity exchanges.

Defi access lies at the heart of financial innovation. On behalf of our shareholders and investors, we identify opportunities and areas of innovation to build and invest in new

technologies and ventures to provide diversified exposure across decentralized finance opportunities.

As a trusted partner for our clients and investors, we provide industry-leading equity products, top-quality research, and education in this fast-growing space. Defi access offers an easy-to-use platform that enables you to securely invest in cryptocurrencies, or own ready-made “crypto baskets” – which we call Portfolio’s. This removes the guesswork and enables you to effortlessly own a wide variety of the top cryptocurrencies.

Defi access is a concept of financial ecosystem, living digitally on a shared infrastructure to handle a multi task decentralized transactions through the operation of Web 3.0 and blockchain-based web services. Defi access is the leading solutions solving the feasibility and accessibility to anyone trying to venture in DeFi platforms and decentralized protocols. Due to its reputation for compos ability and stability.

## **Why invest with Defi access?**

If you thought investing had to involve confusing jargon, terrible customer service, overwhelming options, or hidden fees, think again! Because with Defi access, you can go from cash to DeFi instantly. We exist to make investing effortless and secure.

We don’t think investing should only be for the fancy finance people. That’s why our mission is to empower you to become your own wealth manager. With our online platform you can easily invest in Defi staking, real estate, or you can earn an interest-like return on your crypto with our DeFi Savings Vault, with more exciting options coming soon.

## **Get started in few steps:**

If you’re fascinated by all the golden opportunities DeFi could offer you, you’re off to a good start. But that’s not the difficult part, is it? The difficulty comes now turning those opportunities into reality, within the space of Defi access, this process can actually be quite achievable when you know the right steps to take and proper strategies to adopt.

### **1. Prepare a Wallet**

Your crypto wallet is a digital entity where you’ll store the crypto coins that you’ll use to participate in DeFi protocols. Choose any wallet of your choice.

## 2. **Purchase Crypto Coins**

Just like you need cash to invest in stocks, you need crypto coins to participate in DeFi protocols. If your wallet is also an exchange, you can purchase crypto there, you can as well buy from Binance or Coinmama and that makes having crypto look pretty simple.

## 3. **Get Started With our portfolio**

Time to dive into those protocols that make DeFi so popular! There are protocols that enable investors to participate in any project of your choice, within the space of DeFi where you'll receive earnings depending on the package you choose to engage in, where your participation earns interest/returns.
